

GODWIN MALINDE

Software Developer | Software Engineer | Networking

Phone: +256-787-192342 • Email: malindegodwin9@gmail.com • Address: Tororo, Uganda

Portfolio: <https://godwin-portfolio-gamma.vercel.app/>

PROFESSIONAL SUMMARY

A versatile and motivated software developer with a solid foundation in Computer Science and practical experience across frontend and backend development, JavaScript programming, and network operations. Known for a proactive learning attitude and readiness to take on new challenges, with a commitment to continuous personal and technical growth. Strong in problem-solving, time management, and teamwork, and passionate about using technical skills to build innovative, reliable solutions. Excels in collaborative environments and is dedicated to delivering value through a strong work ethic and a growth-focused mindset.

PROFESSIONAL EXPERIENCE

Industrial Trainee

June 2024 – August 2024

Full Stack Developer, OSP IT Digital Solution

Kampala, Uganda

Gained hands-on experience in both frontend and backend development, including designing clean User Interfaces (UI) and engaging User Experiences (UX). Worked with **JavaScript** for interactive frontend features and **PHP** for server-side functionality. Also used **Figma** to prototype UI/UX designs and improve workflow.

- Crafted intuitive UX flows that improve user navigation and overall usability.
- Developed responsive JavaScript interfaces compatible with different screen sizes.
- Gained exposure to the full software development lifecycle (SDLC), from planning to testing.
- Implemented backend features using PHP, including data handling and server logic.

Skills Acquired: UI Design and Prototyping || Responsive Design using Bootstrap, CSS, and JavaScript || Backend Development using PHP || UX improvement & wireframing with Figma

PROJECTS

LEARNING MANAGEMENT SYSTEM

[LINK](#)

Tech Stack: PHP, Bootstrap, JavaScript

Description: A web-based platform that simplifies learning by allowing students and lecturers to manage courses, access assignments, track progress, and share educational resources efficiently. It enhances communication, organizes academic activities, and improves the overall learning experience.

Key Features Implemented:

- Planned, designed, implemented, and tested the entire Learning Management System
- Developed a responsive and intuitive user interface for students, lecturers, and administrators
- Implemented core modules including course management, assignment submissions, and progress tracking
- Enabled effective resource sharing and announcements to improve communication
- Built secure authentication and role-based access control for different user groups
- Integrated reporting features to help monitor student activity and course performance
- Ensured system reliability and maintainability through consistent testing and best practices

AI RESUME ANALYZER – Web Developer

[LINK](#)

Tech Stack: ReactJS, Typescript, PuterJS, TailwindCSS

Description: An AI-powered assistant that analyzes your résumé against a job description and provides personalized suggestions to improve relevance, clarity, and ATS performance. It identifies missing keywords, enhances bullet points, and helps you present a stronger, job-ready résumé.

Key features:

- Designed and built the full user interface using ReactJS, TypeScript, and Tailwind CSS
- Implemented résumé upload and text extraction workflow for clean, structured analysis
- Integrated AI-powered comparison logic to evaluate résumés against job descriptions
- Developed keyword-matching and skill-gap detection features for accurate insights
- Built dynamic suggestions and improvement tips to enhance ATS compatibility and clarity
- Optimized the user experience with smooth interactions and fast performance using PuterJS
- Developed a fully responsive design ensuring seamless use across desktops, tablets, and mobile devices

AI-CODE Response Generator – Web Developer

[LINK](#)

Tech Stack: ReactJS, Python, LLMs

Description: A FastAPI and LLM-powered application that automatically generates coding challenges with multiple-choice options, evaluates user answers, and provides accurate feedback and explanations.

Key Features:

- Built a FastAPI backend in Python to generate coding challenges, evaluate answers, and deliver structured responses
- Integrated GPT-4 to create questions, multiple-choice options, explanations, and personalized feedback
- Developed a simple, intuitive frontend for users to attempt challenges and view results smoothly
- Ensured reliable system performance with clean API design, error handling, and efficient LLM interaction

EDUCATION

B.Sc. Computer Science

2022-2025

Busitema University

Tororo, Uganda

High School

2014-2019

Rock High School

Tororo, Uganda

SKILLS

- Programming Languages: JavaScript, Python, TypeScript, PHP, HTML, CSS & SQL
- Frameworks & Libraries: React, NextJS, Tailwind CSS
- Database(s): MySQL
- Version Control: Git, GitHub
- Other: Networking fundamentals, technical support

CORE COMPETENCIES

- Analytical reasoning and effective problem-solving
- Collaborative teamwork with clear, professional communication
- Strong time management and organizational discipline
- Flexibility with a commitment to continuous learning
- Project coordination and hands-on execution
- User-focused and client-oriented development approach

Language(s)

- English (Fluent)

REFREES

Dr. Angole Richard Okello

Head of Department Computer Studies Busitema University

Tel: +256-772-578-587

Eng: Ekatatan Josua

IT Technician Busitema University

Tel: +256-781-581-390

Mr. Tumwebaze Moses

Cyber School Technology

Tel: +256-704 905913

Mr. Oguti David

IT Manager, OSP IT Digital Solutions
